

Terrorism Awareness, Prevention, Preparedness and Response

The attacks on The World Trade Center and The Pentagon were shocking events indicating increasingly violent global activity. As a result, the need for proactively securing facilities and communities for all types of emergencies is a paramount demand on government, law enforcement and private security officials. Ultimately, comprehensive risk assessment and implementation of programs to safeguard lives, property and information requires unprecedented urgency.

These services focus on understanding terrorism and the development of comprehensive safety and security plans through risk assessment and integration of security strategies for facilities and communities. Insight for implementation of relevant target hardening, community partnerships, facility protection, emergency planning and life saving evacuation plans will be demonstrated.

These programs will benefit law enforcement and private security professionals as well as governmental officials entrusted with the health, safety and welfare of communities, facilities and institutions.

Some of the issues that will be presented include:

- **How Terrorists Operate**
- **Improvised Explosion Devices And Bombings**
- **Weapons Of Mass Destruction**
- **Cyber Terror**
- **Islamic Extremists**
- **Domestic Terrorism**
- **Hate Groups**
- **Terrorism Warning Signs**
- **Observing And Reporting**
